

PeckarEyeClinic

Eye Consultant and Specialist Surgeon

As part of the celebration of healthcare developments during the last 60 years, the Peckar Eye Clinic has been selected to appear in the Parliamentary Year Book, as an example of a modern innovative private practice clinic running alongside the NHS.

Eye Conditions

The Peckar Eye Clinic specialises in treating conditions at the front of the eye, including surgery of the conjunctiva (the skin covering the eye), cornea (the clear window in front of the eye), lens (e.g. 'cataract') and 'glaucoma'. Many of the patients referred to the clinic attend because of problems with irritation or discomfort in their eyes, or problems with seeing clearly. Details of the most common eye conditions treated, together with an ophthalmic dictionary and some comments by patients can be found on the website.

The Clinic

Mr Clive Peckar, Consultant Ophthalmic Surgeon, has been in ophthalmic practice since qualifying at St Thomas' Hospital London, where he obtained the Hudson Prize in Ophthalmology in 1971. He has been practicing as an NHS consultant for the last 25 years, and at the Peckar Eye Clinic, within the Spire Cheshire Hospital (previously the BUPA North Cheshire Hospital) for the last 20 years. As Mr Peckar is the only ophthalmic surgeon practicing within the Peckar Eye Clinic, patients see "the same doctor at every visit". Mr Peckar is supported in his work by his private Optometrist, Mrs Kirsty Eagers and his Secretary and Practice Manager Mrs Laraine Woodall. There are a large range of

speciality diagnostic services and operating facilities available within the hospital which provide support to the clinics and also allow referral to other medical practitioners, should this be indicated.

The clinic is centrally located, being close to Junction 10 on the M56 motorway.

Consultations and Surgery

Patients wishing to have a consultation, to discuss medical treatment or surgery, are recommended to obtain a referral from their general practitioner in advance of the consultation, in order that Mr Peckar will have full details of their medical past history. They are invited to telephone Mrs Laraine Woodall to discuss their possible needs prior to attending the clinic.

The Website: www.PeckarEyeClinic.co.uk

The Peckar Eye Clinic website includes full details of:

- The Clinic Team.
- Eye Conditions.
- Ophthalmic Dictionary.
- Videos.
- Patients' Comments.
- Contact Information.
- Mr Peckar's full CV.

Invitation

Patients and medical colleagues are invited to visit the website for further information regarding ophthalmic conditions treated at the clinic and feedback, regarding the website, is welcome.

**Mr Clive O Peckar MSc(Oxon), FRCS, FRCSEd, FRCOphth
Consultant Ophthalmic Surgeon**
